

Securely share, sync and store large files in the cloud

Citrix ShareFile is a secure, cloud-based file sharing and storage solution specifically built for business. Send, receive, sync and store files with anyone, anywhere, using any device!

Easily retain security and control of all users

- Provide users instant access to up-to-date files.
- Support mobile work with secure file sharing inside and outside the organization.
- Provide IT the control and management required to help ensure security and compliance.
- Create advanced reports and usage audits on file-sharing activity.

Sync files across all of your devices

- Sync information across all devices, including mobile phones and tablets.
- Access your data when you need it, wherever you are.
- Integrate with Microsoft Outlook to send secure links through email.
- Collaborate in real time with automatic file updates, so you are always working on the most updated version.

Powerful and simple-to-use features

Professional

When you sign up for a ShareFile account, our graphic design specialists will customize your web portal to seamlessly match your company logo and website at no extra charge.

- Create online folders with customizable permissions.
- Confirm that clients have received files with custom tracking and alerts.
- Access your web portal from a Mac or a PC.

Key benefits

- Increase productivity and share files anywhere, anytime
- Save money and time exchanging and organizing documents
- Securely track account activity with multi-level access controls and notifications

Secure and Compliant

With ShareFile, you can be confident that your data is sent securely. Our SSAE 16 Type II accredited datacenters help ensure privacy and security of confidential information.

- Easily send and receive all file types with SSL/TLS protocols and up to 256-bit encryption.
- Create granular folder permissions for individual users.
- Set passwords on client folders for increased security.

Tools and apps you'll love

Desktop Widget

Efficiently upload, download and delete files without ever launching a web browser.

Outlook Plugin

Quickly send and request files directly from Microsoft Outlook.

Sync

Automatically sync folders within your account to folders on your computer for data updates and backup.

Mobile Tools

Easily access files and folders anytime from your favorite smartphone or tablet, including Apple iOS, Android, Blackberry and Windows Phone.

Citrix ShareFile

The ShareFile service was launched in November 2005. In the six years following its initial release, ShareFile grew organically with no outside capital. In October 2011, Citrix announced its acquisition of ShareFile. Citrix (NASDAQ:CTXS) is a leading provider of virtual computing solutions that help people work and play from anywhere on any device. Today ShareFile is the file-sharing service of choice for more than 30,000 businesses – including 99 percent of Fortune 500 companies – with more than 10 million individual users in 100 countries.

“The functionality, feature set and customer service are top-notch!”

Zack Schildhorn
Lux Capital

“The biggest impact ShareFile has had on our firm is the ability it gives us to streamline operations. We are able to provide documents to our clients and consultants in much less time, without any of the hassles we experienced earlier with email and FTP.”

Brian Crooke
William Hezmalhalch
Architects
